Amine Bouramtane

AI Engineer

+212 602716306 bouramtaneamine1@gmail.com Amine Bouramtane Aminebouramtane

Summary

AI Engineer with a Master's in Artificial Intelligence and over a year of professional experience across AI engineering and data analysis. Skilled in machine learning, deep learning, computer vision, RAG systems, and recommendation engines. Experienced in building AI-powered applications and data-driven products with Python, PyTorch, TensorFlow, OpenCV, SQL, and Power BI, backed by a strong software engineering background.

Education

1337 Coding School – UM6P Benguerir **Present**
Computer Science Student — Software Architecture & Advanced Development *Benguerir, Morocco*

Faculty of Sciences Semlalia, Cadi Ayyad University **2026**
Master's Degree in Artificial Intelligence & Data Science *Marrakech, Morocco*

Mohammed Premier University **2024**
Bachelor's in Data Analytics and Decision-Making Systems – Honors *Oujda, Morocco*

Experience

HEEC **6 Months**
AI Engineer Intern *Morocco*
- Built an e-learning application powered by a RAG system, with an AI chatbot coach for each course answering from the course's own content
- Designed and implemented an advanced recommendation system to personalize learning paths and course suggestions for learners

NewDev Fès **6 Months**
Data Analyst *Fès, Morocco*
- Cleaned, transformed, and analyzed datasets with Python, Pandas, NumPy, and SQL to generate actionable business insights
- Built data visualizations and dashboards, and prepared validated datasets for statistical analysis and machine learning

Atlecs **4 Months**
Full-Stack Developer Intern *Fès, Morocco*
- Developed and deployed web applications with Laravel and Livewire; optimized queries and implemented CI/CD pipelines

Projects

AI-Powered Video Surveillance for Smart Agriculture | *Python, YOLOv8, DETR, OpenCV, MQTT* **2026**
- Developed real-time intrusion detection with YOLOv8 and DETR, with OpenCV stream processing and MQTT communication
- Optimized model inference for edge deployment, achieving real-time performance on surveillance feeds

E-Commerce Data Mining & BI Platform | *Python, MySQL, Power BI, Scikit-learn* **2026**
- Analyzed 7,000+ transactions: RFM segmentation with K-Means, predictive models with Random Forest and Gradient Boosting
- Designed a star schema data warehouse and interactive Power BI dashboards

Real-Time Object Detection & Tracking Pipeline | *Python, PyTorch, OpenCV, TensorFlow* **2025**
- Built a video detection pipeline with YOLO and CNN classifiers; benchmarked YOLOv5, YOLOv8, and DETR on custom datasets

Customer Churn Analysis Dashboard | *Power BI, Python, Pandas, Scikit-learn* **2025**
- Built a churn prediction model on 7,000+ customer records and Power BI dashboards tracking churn, revenue, and segments

Technical Skills

AI & ML: Python, Scikit-learn, PyTorch, TensorFlow, Deep Learning, RAG, LLM Chatbots, Recommendation Systems, Edge Deployment
Computer Vision: OpenCV, YOLO (v5/v8), DETR, CNNs, Real-Time Video Analytics
Data & BI: Pandas, NumPy, SQL, MySQL, MongoDB, Power BI, Data Warehousing
Full Stack: PHP, Laravel, Livewire, JavaScript, REST APIs, Git, CI/CD, Docker
Other: Linux, MQTT, JIRA

Languages

Arabic (Native) — French (B1) — English (B2)
